

Area of Maths: Addition and Subtraction

Skill: Solve problems with addition and subtraction

YOU WILL NEED...

Resources:

There are downloadable resources available to accompany this lesson.

Equipment:

You will need pens and pencils.

Instructions:

1. Split the class into small groups and place the 20 question cards around the room. If you have a smaller group the children could work by themselves.
2. The children start from different cards and the answer to the question will tell the pupils which card to go to next.
3. The first group (or child if working independently) to complete the course correctly are the winners.
